

Prolific Blue

(12 - 5.2 - 14.1 +6S + 1.2 Mg)

Prolific Blue is a granular compound fertiliser that meets the complete nutritional requirements of sugar cane, vegetable crops, trees, vines, fruits, flowers, turf and ornamentals.

Suitable for pre-plant, planting and side dressing applications.

FEATURES & BENEFITS:

- Ideal for base dressing before planting
- Reduced leaching from the rootzone after irrigation or heavy rainfall
- Phosphorus is in a water soluble form allowing quick uptake by plant roots assisting plants to establish much faster
- Due to its no dust, more consistent particle size, a much more even application can be achieved than other compound NPK's on the market.

APPLICATION	KG/Ha
Vegetables	400 - 800
Fruit Trees	400 - 600
Vines	250 - 800
Sugar Cane	400 - 800
Turf	250 - 400
Nurseries	400 - 600

Approximate application rates are suggested in the absence of soil tests. It is recommended you undertake a soil test prior to application.
